

Customer Shopping Behavior Analysis

1. Project Overview

This project analyzes customer shopping behavior using transactional data from 3,900 purchases across various product categories. The goal is to uncover insights into spending patterns, customer segments, product preferences, and subscription behavior to guide strategic business decisions.

2. Dataset Summary

- Rows: 3,900
- Columns: 18
- Key Features:
 - Customer demographics (Age, Gender, Location, Subscription Status)
 - Purchase details (Item Purchased, Category, Purchase Amount, Season, Size, Color)
 - Shopping behavior (Discount Applied, Promo Code Used, Previous Purchases, Frequency of Purchases, Review Rating, Shipping Type)
 - Missing Data: 37 values in Review Rating column

3. Exploratory Data Analysis using Python

We began with data preparation and cleaning in Python:

- **Data Loading:** Imported the dataset using `pandas`.
- **Initial Exploration:** Used `df.info()` to check structure and `.describe()` for summary statistics.

	Customer ID	Age	Gender	Item Purchased	Category	Purchase Amount (USD)	Location	Size	Color	Season	Review Rating	Subscription Status
count	3900.000000	3900.000000	3900	3900	3900	3900.000000	3900	3900	3900	3900	3863.000000	3900

- **Missing Data Handling:** Checked for null values and imputed missing values in the **Review Rating** column using the median rating of each product category.

- **Column Standardization:** Renamed columns to **snake case** for better readability and documentation.

- **Feature Engineering:**

- Created **age_group** column by binning customer ages.

- Created **purchase_frequency_days** column from purchase data.

- **Data Consistency Check:** Verified if **discount_applied** and **promo_code_used** were redundant; dropped **promo_code_used**.

- **Database Integration:** Connected Python script to MySQL Workbench and loaded the cleaned Data Frame into the database for SQL analysis.

4. Data Analysis using SQL (Business Transactions)

We performed structured analysis in MySQL Workbench to answer key business question:

1. **Revenue by Gender** – Compared total revenue generated by male vs. female customers.

	gender	revenue
▶	Male	157890
	Female	75191

2. **High-Spending Discount Users** – Identified customers who used discounts but still spent above the average purchase amount.

	customer_id	purchase_amount
▶	2	64
	3	73
	4	90
	7	85
	9	97
	12	68
	13	72
	16	81
	20	90
	22	62
	24	88
	29	94
	32	79
	33	67
	35	91
	37	69

839 row(s) returned

3. **Top 5 Products by Rating** – Found products with the highest average review ratings.

	item_purchased	average_product_rating
▶	Shirt	3.62
	Jeans	3.65
	Blouse	3.68
	Shorts	3.71
	Scarf	3.71

4. Shipping Type Comparison – Compared average purchase amounts between Standard and Express shipping.

	shipping_type	avg_purchase_amount
▶	Express	60.48
	Standard	58.46

5. Subscribers vs. Non-Subscribers – Compared average spend and total revenue across subscription status.

	subscription_status	total_customers	avg_purchase_amount	total_revenue
▶	Yes	1053	59.49	62645
	No	2847	59.87	170436

6. Discount-Dependent Products – Identified 5 products with the highest percentage of discounted purchases.

	item_purchased	percentage
▶	Hat	50.00
	Sneakers	49.66
	Coat	49.07
	Sweater	48.17
	Pants	47.37

7. Customer Segmentation – Classified customers into New, Returning, and Loyal segments based on purchase history.

	customer_segment	no_of_customers
▶	Loyal	3116
	Returning	701
	New	83

8. Top 3 Products per Category – Listed the most purchased products within each category.

	category	item_purchased	rn	total_orders
▶	Accessories	Jewelry	1	171
	Accessories	Sunglasses	2	161
	Accessories	Belt	3	161
	Clothing	Blouse	1	171
	Clothing	Pants	2	171
	Clothing	Shirt	3	169
	Footwear	Sandals	1	160
	Footwear	Shoes	2	150
	Footwear	Sneakers	3	145
	Outerwear	Jacket	1	163
	Outerwear	Coat	2	161

9. **Repeat Buyers & Subscriptions** – Checked whether customers with >5 purchases are more likely to subscribe.

	subscription_status	repeat_buyers
▶	Yes	958
	No	2518

10. **Revenue by Age Group** – Calculated total revenue contribution of each age group.

	age_group	total_revenue
▶	Young Adult	62143
	Middle Aged	59197
	Adult	55978
	Senior	55763

5. Dashboard in Power BI

Finally, we built an interactive dashboard in **Power BI** to present insights visually.

6. Business Recommendations

- **Boost Subscriptions** – Promote exclusive benefits for subscribers.
- **Customer Loyalty Programs** – Reward repeat buyers to move them into the “Loyal” segment.
- **Review Discount Policy** – Balance sales boosts with margin control.
- **Product Positioning** – Highlight top-rated and best-selling products in campaigns.
- **Targeted Marketing** – Focus efforts on high-revenue age groups and express-shipping users.
